Dear Commissioner;

In reference to docket no. 213-201-WS, I wish to express my opinion on this request. I live in the Vanarsdale, subdivision that receives water and sewer from this company, and wonder why you would be holding a hearing so far away from our neighborhood. am retired and live on a budget income, so I have to be very careful how I spent my money. We are now paying \$27 to \$30 per month for water and \$41.81 cents per month for sewer which is much higher than the average area is paying. There are only two senior citizens in my household, I do very little cooking as my children bring our meals, we shower two to three times weekly, we do not water the yard, we have no pool, we don't wash our car , so why should I have to pay \$64.52 per month for something I don't use>?

I understand that Utilities Inc. has a lot for expense installing these facilities in all these different section[;none of which is our section:] what I'm not understanding is why we are being charged for them.

Please do not grant this request.

Sincerely:

Frances S. Vinson
